[REDACTED] Comments.

(1) The information confirms the replacement of air force units in Eisenstadt by army units, as was mentioned in reports of 3 and 7 July 1951 by other sources. [REDACTED] Both the building of the former provincial government and the Jaeger Kaserne quarter army units, [REDACTED] belongs to a driving school of the Central Group of Forces, which was formerly stationed in Moedling. The [REDACTED] of the [REDACTED] belong to an element of the 95th Gds Mtz Rifle Div, which was previously stationed in Bad Fischau.

(2) The new arrivals were probably recruits. The fact that one of the trains came from St. Poelten again indicates that one of the army units now in Eisenstadt belongs to the 95th Gds Mtz Rifle Div.

(3) All motor vehicles belong to the 13th Gds Mtz Rifle Div.

(4) Another source reported a large Soviet radio station, which consisted of 15 masts about 20 meters high, as early as April 1951. [REDACTED] Since the first report on the establishment of an antenna system in Traiskirchen coincided with a report from Blumau stating that the antenna system there was no longer seen, the conclusion was reached that the radio station at Blumau had been moved to Traiskirchen. This hypothesis is strengthened by the present report on Blumau, stating that no antenna system was observed there.
